

JAMA GROUP

JAMA Group provides IT Security and Service Solutions in Australia's Health and Age Care industries. They have 15 technicians doing installation projects, including security devices, cable, Nurse Call systems.

JAMA Group use simPRO to manage their project work and were previously using another time tracking system that did not integrate with simPRO. After growing tired of double-handling and inefficiency they began researching alternatives.

They found SyncEzy and TSheets, a timesheet solution with an easy sync to and from simPRO, that provided them with a more reliable application that was also user-friendly. The transition was very easy for field staff and their office team. In describing the transition, Marlon (Systems Analyst at JAMA Group) said:

TSHEETS SAVES US LOT OF TIME! BEFORE WE NEEDED A LOT OF MANUAL INPUT FROM ONE SYSTEM TO ANOTHER. GREAT SYSTEM, YOU WILL SEE THE BENEFITS RIGHT AWAY!

SYNC  EZY
