

JDL Construction has been building and restoring homes in Brisbane for more than 20 years. They strive for Organisation, Transparency & Quality in all the work they do.

We asked Kieran Lewis from JDL Construction to describe his experience using the Procore to Dropbox integration by SyncEzy.

Q: What were your processes before using the Procore to Dropbox integration?

A: Prior to the Procore/Dropbox integration, we were using a combination of BuilderTrend and Dropbox but they weren't linked.

Q: What made you want to change?

A: After having a demo of the integration with the SyncEzy sales team, I liked the ease of access to information for all stakeholders involved. The integration removed data entry double-up and the copy/paste of information. We're now confident that information is always current.

Q: How did you find SyncEzy?

A: We found SyncEzy when searching for Procore-approved integrations on the Procore Marketplace.

Q: What have been the big wins whilst you have been using the integration?

A: The biggest win was only needing to save items once and then having everyone access the file/s through either Dropbox or Procore...and it is always current information.

Q: Lastly, if you were describing the integration and its value when chatting to a friend, how would you describe it?

A: I'd say that the integration was very good.

**THE BIGGEST WIN WAS
ONLY NEEDING TO
SAVE ITEMS ONCE.**
