We asked Rob Gabriele from Bass Installation about their use of the Procore to SharePoint integration and how it has helped their company.

Q: **On a scale of 0 to 10, how likely are you to recommend SyncEzy to your colleague or friend?**
A:10

Q: What were your processes before using this integration?
A: We did not have a synchronized solution. Documents & files were in silos and we spent time downloading files from Sharepoint just to re-uploading into Procore.

Q: What made you want to change from your previous processes to the integration with SyncEzy?
A: We decided to integrate the documents into the Procore platform to reduce the redundant tasks and time-savings. Some of the files we had to move from SharePoint to Procore were large files taking up considerable bandwidth and time. Now we can import drawing files directly from Procore Documents than uploading them manually.

Q: What were the big wins while you have been using the integration?
A: Time savings from file/document transfers: We can now provide field workers, who would otherwise not have access to company SharePoint sites, with access to project files. This is particularly beneficial when creating Submittal's or Transmittal's in Procore since the files are already within the Procore environment, resulting in significant time savings.

Q: Lastly, how would you describe the integration and its value when chatting to a friend?
A: Seamless transition and great on-boarding from the team at SyncEzy! We have all the tools to completely manage this integration from SyncEzy's portal.

IT SEAMLESS TRANSITION AND GREAT ON-BOARDING FROM THE TEAM AT SYNCEZY! WE HAVE ALL THE TOOLS TO COMPLETELY MANAGE THIS INTEGRATION FROM SYNCEZY'S PORTAL.
