

We spoke to Minki Kang from Building Engineering about their use of the Procure to SharePoint integration and how it has helped their company.

On a scale of 0 to 10, how likely are you to recommend SyncEzy to your colleague or friend?

A: 10

Q. What were your processes before using this integration?

A: Procure Sync was being used before its retirement in September 2022.

Q: What made you want to change from your previous processes to the integration with SyncEzy?

A: The previous process was unreliable at times and no longer supported.

Q: What were the big wins while using the integration?

- Simple admin interface and high-performance sync speeds after switching to SE's private server
- Switching from Procure > Teams to Procure > SharePoint has enabled additional features such as improved monitoring and project size assessment.

Q: Lastly, how would you describe the integration and its value when chatting with a friend?

A: Simple to set up, up for Procure / Microsoft integrations. There is a difference between the different Microsoft products ie. Teams, OneDrive, SharePoint. Go with SharePoint for the optimal experience as that is the product that the SE dev the team have set their focus on.

THE PREVIOUS PROCESS WAS UNRELIABLE AT TIMES AND NO LONGER SUPPORTED.

MINKI KANG - ICT SYSTEM ADMINISTRATOR AT BUILDING ENGINEERING
