We spoke to Sam Cheffi from Building Engineering about their use of the Procore to SharePoint integration and how it has helped their company.

Q: What were your processes before using the Procore to SharePoint integration?
A: Prior to using the integration, most staff used Procore Sync and some operated manually, using only Procore.

Q: What made you want to change?
A: With high volumes of Procore documents being modified, renamed and other general operations, we needed a solution to increase efficiency. Procore Sync was also retired in late September 2022 so we needed a replacement.

Q: What have been the big wins whilst you have been using the integration?
A: Procore documents being accessible from any location and on our desktops via SharePoint, Teams and OneDrive is extremely helpful.

Q: Lastly, if you were describing the integration and its value when chatting to a friend, how would you describe it?
A: ...I would say it's a great replacement and improved solution to what Procore Sync offered.

A GREAT REPLACEMENT AND IMPROVED SOLUTION TO WHAT PROCORE SYNC OFFERED

SAM CHEFFI - ICT MANAGER AT BUILDING ENGINEERING
