We spoke to Sam Rice from Rice Group about their use of the Procore to SharePoint integration and how it has helped their company.

Q: On a scale of 0 to 10, how likely are you to recommend SyncEzy to your colleague or friend?
A: 9

Q: What were your processes before using the Procore to SharePoint integration?
A: Manually uploading documents that were required by our Site Teams is no longer necessary. Now, we can simply sync the information, eliminating that step and providing additional information beyond what was previously deemed necessary.

Q: What made you want to change?
A: Time savings and able to provide additional information to other stakeholders purely through Procore.

Q: What have been the big wins whilst you have been using the integration?
A: Being able to restrict access to our core information on One drive and ability to provide information through Procore to a number of different stakeholders.

Q: Lastly, if you were describing the integration and its value when chatting to a friend, how would you describe it?
A: We find the integration awesome. Our only suggestion is that the interface could use some work to simplify the process; it feels a little backend-ish.

WE FIND THIS INTEGRATION AWESOME.
