

Enhancing Project Management with ProcCore Integration Using SyncEzy - A Testimonial from Alexander Gomez, Project Engineer at TABOR

Discover how SyncEzy's ProcCore and SharePoint integration has transformed TABOR's project management, enabling them to stay ahead in their competitive landscape, as we delve into the insights provided by Alexander Gomez.

Q: What were your processes before using this integration?

A: Each member of the work team had the project information on their personal computer. There was no common repository for the management of the information.

Q: What made you want to change from your previous processes to the integration with SyncEzy?

A: The company decided to invest in a CDE for the management of information in our ProcCore case. After this, integration with Sharepoint was necessary, which is the platform that was managed internally for backup with the company's internal server.

Q: What were the big wins while using the integration?

A: Maintain a complete and immediate synchronisation of the company's project information among the multiple participants. It also helped us to have a single version of the updated documents and reduce the storage space on the laptops of those involved.

Q: Lastly, how would you describe the integration and its value when chatting with a friend?

A: It is a great advantage to keep the information always up to date and in one place to ensure that all team members always have the same version of the documents

If you're seeking to enhance your project management processes and elevate your outcomes, SyncEzy's ProcCore and SharePoint integration is an essential tool in your toolkit. Discover the potential to revolutionize your project management and achieve unprecedented efficiency with SyncEzy.

WITH SYNCEZY'S PROCORE AND SHAREPOINT INTEGRATION IN PLACE, TABOR WITNESSED A REMARKABLE SHIFT IN PROJECT MANAGEMENT EFFICIENCY. THIS POWERFUL INTEGRATION FACILITATED SEAMLESS DATA SYNCHRONIZATION, STREAMLINED COLLABORATION, AND OPTIMIZED PROJECT OUTCOMES.
