

We spoke to Daniel Feller from Dishtec about his use of the simPRO to Xero integration and how it has helped his company.

Previously, Daniel's team were manually printing out timesheets, calculating the number of hours worked and then entering into Xero. This process was taking 1-2 hours and the mental effort in calculating hours was the most taxing on staff, with the added risk of manual errors.

After signing up to the simPRO to Xero integration, Daniel's service coordinator can now check the simPRO data then sync into Xero for Daniel's accountant to view. This has removed a huge amount of manual-processing and has freed up more of Daniel's valuable time, plus he's confident that times are correct when the timesheets are added into Xero.

In describing the transition, Daniel said:

**A WORTHWHILE
INVESTMENT IF YOU'RE
LOOKING TO AUTOMATE
AND DELEGATE TIMESHEETS
CALCULATIONS WITH
CONFIDENCE.**

DANIEL FELLER - MANAGING DIRECTOR AT DISHTEC
