

We spoke to Chris Thomas from Harkins Builders about their use of the Procore to SharePoint integration and how it has helped their company.

Q: What were your processes before using this integration?

A: We were using HingePoint to sync documents between SharePoint and Procore.

Q: What made you want to change from your previous processes to the integration with SyncEzy?

A: HingePoint had become unreliable.

Q: What were the big wins while you have been using the integration?

A: Being able to sync RFI's, submittals and photos in addition to documents has been pretty cool. Having a more reliable tool to sync the document is the biggest positive though.

Q: Lastly, how would you describe the integration and its value when chatting to a friend?

A: It's reliable and easy to use.

BEING ABLE TO SYNC RFI'S, SUBMITTALS AND PHOTOS IN ADDITION TO DOCUMENTS HAS BEEN PRETTY COOL.

CHRIS THOMAS - DIRECTOR OF INFORMATION TECHNOLOGY AT HARKINS BUILDERS
