

PROCORE® Microsoft Teams

Integrating Procore with Microsoft Teams enables bidirectional communication, real-time updates, document sharing, and improved collaboration.

Real-Time Project Updates

Stay informed with instant notifications and updates from Procore within Microsoft Teams, ensuring all team members are on the same page and aware of project changes.

Document Collaboration

Effortlessly share and collaborate on Procore project documents, drawings, and plans directly within Microsoft Teams, enhancing document management and teamwork.

Task Management and Assignments

Create, assign, and track project tasks from Microsoft Teams, synchronising them with Procore for efficient task management and progress monitoring.

Bidirectional Communication

Initiate discussions and communicate seamlessly between Procore and Microsoft Teams, fostering real-time collaboration, problem-solving, and decision-making.

Work on BlueBeam files and PDF markups Locally

Easily work on BlueBeam files locally by accessing the files from your Windows Explorer.
