

We spoke to Bart Brichau from Teltrac about their use of the simPRO to Sharepoint integration and how it has helped their company.

Q: What were your processes before using this integration?

A: None really, if we wanted to use attachments from Simpro jobs in Sharepoint, we had to manually download/copy and paste

Q: What made you want to change from your previous processes to the integration with SyncEzy?

A: like any decent integration, it's the fact that at any time, the two integrated platforms are synchronised, and the ability to make changes on either platform, knowing the changes will be reflected on the other platform.

Q: What were the big wins while you have been using the integration?

A: Saving time and money, more efficient working, better and easier access to information.

Q: Lastly, how would you describe the integration and its value when chatting to a friend?

A: It's a very painless integration, SyncEzy have made it very easy to implement. It's also great to see the support is quite responsive.
