

We spoke to Kaushik Mancell, National HSEQ Systems Coordinator at STOWE AUSTRALIA PTY LTD, about their use of the Simpro SafetyCulture integration and how it has helped their company.

Q: What were your processes before using this integration?

A: We were using eForms in Simpro.

Q: What made you want to change from your previous processes to the integration with SyncEzy?

A: eForms were no longer supported by our Simpro platform.

Q: What were the big wins while you have been using the integration?

A: We are a significant user of SafetyCulture. The ability to develop specific templates for high-risk SWMS reviews for our field teams, and to attach evidence of those reviews directly to our Simpro jobs, is a major advantage.

Q: Lastly, how would you describe the integration and its value when chatting to a friend?

A: Our integrations are functioning well overall; however, we've experienced a few minor glitches where a GRS hasn't integrated or transferred correctly. I must say, we really appreciate the Prompt response and follow-up from your support team when we encounter problems.

SyncEzy's Simpro SafetyCulture enables us to use SWMS templates and attach evidence directly to jobs in Simpro. Having Previously used Simpro's eForms, SyncEzy allowed us to process directly within SafetyCulture.
