We spoke to Robert Scott from Alen Security about their use of the Simpro SharePoint integration and how it has helped their company.

Q: What were your processes before using this integration?
A: Did not have a solid backup plan for our data within our system. Now, with the integration, we have all of our core project documents backed up in SharePoint.

Q: What made you want to change from your previous processes to the integration with SyncEzy?
A: Data Redundancy. In case there are issues with Simpro, or we move to another system, we have a database of all our projects/ jobs and customer documents.

Q: What were the big wins while you have been using the integration?
A: Getting it in place and working seamlessly.

Q: Lastly, how would you describe the integration and its value when chatting to a friend?
A: Everyone at SyncEzy has been great to deal with, and you are all listening to your customers. That is a huge value when looking to make an integration to make sure things are set up properly, and you are getting what you want out of it. Very pleased with the team as we continue to grow with them as a customer.
