

**We spoke to Delfin Catapang from Tradetech Services Australia Pty Ltd about their use of the Simpro SharePoint integration and how it has helped their company.**

**Q: What were your processes before using this integration?**

**A:** Before using the SyncEzy integration, our process was mostly manual and required a lot of back-and-forth checking between Simpro and SharePoint.

**Q: What made you want to change from your previous processes to the integration with SyncEzy?**

**A:** We wanted to change from our previous manual process because it was becoming too time-consuming and difficult to manage consistently as the number of jobs and documents increased.

**Q: What were the big wins while you have been using the integration?**

**A:** The big wins from using the SyncEzy integration have been the time savings, better consistency, and Reduced manual work between Simpro and SharePoint.

**Q: Lastly, how would you describe the integration and its value when chatting to a friend?**

**A:** I'd describe it as a handy tool that connects Simpro and SharePoint, so we don't have to keep doing everything manually.

**In simple terms, I'd say SyncEzy makes Simpro and SharePoint talk to each other, which makes our document management much smoother and less painful.**
